

Day2_Assignment

Step-by-step Tasks

1. Create folders:

- Create a folder named abhi
- Create a folder named aman

2. Create 3 files inside abhi: `bash mkdir abhi aman touch abhi/file1.txt abhi/file2.txt abhi/file3.txt`

3. Copy the first file from abhi to aman: `bash cp abhi/file1.txt aman/`

4. Copy the abhi folder into aman folder: `bash cp -r abhi aman/`

5. Copy the third file from abhi to aman with a new name: `bash cp abhi/file3.txt aman/file3_renamed.txt`

6. Delete the aman folder: `bash rm -rf aman`

Final Folder Structure (before deletion)

```
. |— abhi | |— file1.txt | |— file2.txt | |— file3.txt |
aman |— file1.txt |— file3_renamed.txt |— abhi |— file1.txt
    |— file2.txt |— file3.txt
```

Final Step

- After deletion, only abhi folder will remain.

```
rm -rf aman
```
